WORK EXPERIENCE

SOFTWARE DEVELOPER

Mar 2021 – Present

Computer Information Systems, Inc.

Remote

- Brought in to deliver high-priority features, completing end-to-end implementation 75% faster, helping the customer increase efficiency and save time
- Mentored junior developers, helping the team deliver features 20% faster
- Implemented authentication and role-based access, keeping customer data secure while allowing smooth access for different user types
- Optimized database queries and application logic, cutting average response times by 10 seconds, improving the customer experience
- Implemented reusable components and controls in XAML, cutting team development time for new features by 25%

SOFTWARE DEVELOPER

May 2019 – Sep 2019

Northeastern Illinois University

Chicago, IL

- Built and trained machine learning models to detect target patterns in textual data, achieving ~87% accuracy
- Developed Python applications to automate data analysis, working with datasets of over 100,000 records and building reusable tools that sped up research workflows
- Picked up new tools and frameworks and helped teammates understand them, so the team could deliver projects faster

EDUCATION

NORTHEASTERN ILLINOIS UNIVERSITY

Jun 2020

Bachelor of Science

Chicago, IL

Major in Computer Science; Minors in Applied Mathematics

Cumulative GPA: 3.89/4.0; Dean's List 2018-2020; Magna Cum Laude honors

Relevant Coursework: Software Engineering; Data Structures & Algorithms; Database Management; Operating Systems

SKILLS

Programming Languages: C#, Java, Python, SQL, HTML/CSS

Technologies: .NET MAUI, ASP.NET Core, Entity Framework, Azure AD, Docker, XAML, Redis, xUnit
